Forecast for Wednesday 26 Jan 2022

Weather: Patchy cloud and isolated hill fog overnight and into Wednesday morning, becoming more widespread by midday with some light rain/drizzle and summit snow, particularly for Skye and the west coast. Turning more persistent through the afternoon with a period of 4-5 hours rain, and occasionally turning heavy. Widespread gale or severe gales through the afternoon, and possible storm force winds. Rain clearing south through the evening but staying windy with blustery showers.

Chance of cloud free mountain/hill tops above 800m: 40% through the morning with best chances in the north. Lowering 10% or less through the afternoon.

Visibility: Poor in hill fog with cloud down to 400 m in the west and 600 m in the east. Otherwise good lowering moderate in rain through the afternoon.

Met Office Aberdeen Meteorologist's View

Expect a notable wind chill through the afternoon with a combined effect of persistent rain and gale to storm force winds. Maximum gusts speeds may reach 85 mph on exposed summits and ridges.

Forecast for Thursday 27 Jan 2022

Weather: Blustery showers with spells of brighter conditions. These showers will fall as snow above 500 m and may be heavy at times through the morning, before easing later in the afternoon as the strong or gale force northwesterly wind becomes fresh to strong.

Maximum wind: West to northwest 45 mph gusting 60 mph overnight and into Thursday morning, easing later.

Chance of cloud free mountain/hill tops above 800m: 50%

Visibility: Very good away from isolated hill fog in snow showers, where cloud will lower to 500 m with poor visibility.

Temperature: **Glens:** Plus 3 rising to plus 5 around midday.
At 800m: Minus 1
Freezing level: 500 m in north, 700 m in south.
